

The Backbone of Sustainable Next-gen Spaces

आदिश्य is a specialized multidisciplinary design consultancy of MEPF (Mechanical, Electrical, Public Health, and Fire-Alarm / Fighting), offering comprehensive engineering solutions across sectors including infrastructure projects, residential townships and buildings, IT interiors and base build, healthcare, hospitality, data centres, retail, food industries, IT labs, sports facilities, solar power systems, pharmaceuticals.

We are a one stop design solutions company for plumbing, electrical, HVAC, automation, fire safety, solar systems, security systems adherence to Indian and international standards.

Our process and team work closely with architects, structural designers, interior designers, projects managers, landscape consultants, clients, and the associates for seamless and on time project delivery with design intent.

Our core values include commitment to quality, time, and precision which has a proven track record. With our proactive mindset and technical expertise bridging client's ideas into reality with meticulous, industry advanced, cost effective and desirable designs.

The strategic team at आदिश्य is highly experienced to deliver error free, high quality design solutions that meets all your needs as we always focus on client satisfaction.

OUR SERVICES

Electrical

Lighting design, Earthing systems, HV & EHV substations, LV&HV distribution systems, UPS distribution, lightning protection systems, lighting automation, emergency lighting, Urban Designing.

HVAC

Air-conditioning systems, Ventilation system, Critical room air-conditioning, Pressurization system, Inert systems for gas, Industrial Process cooling system, Free cooling systems, integrated BMS & compressed air solutions.

Public Health Engineering (PHE)

Plumbing, Water distribution, Water management, Water treatment plants, Rainwater harvesting systems, Sewerage treatment plant, Effluent treatment plant, borewell, Urban plumbing designing.

Fire-systems

Fire-protection, Fire-alarm, Fire-detection, Public address and suppressions systems

OUR SERVICES

ELV systems

Home automation solution, Water leak detection system and Rodent repellent.

Security systems

Gate security & building perimeter security, CCTV & Access control system

Solar systems

Roof mount & Ground mount solar solutions, Solar power systems

Feasibility studies

Analysis and feasibility study of current systems with third part review of MEP design.

Revit and BIM

Clash detection report of MEP models in Revit.

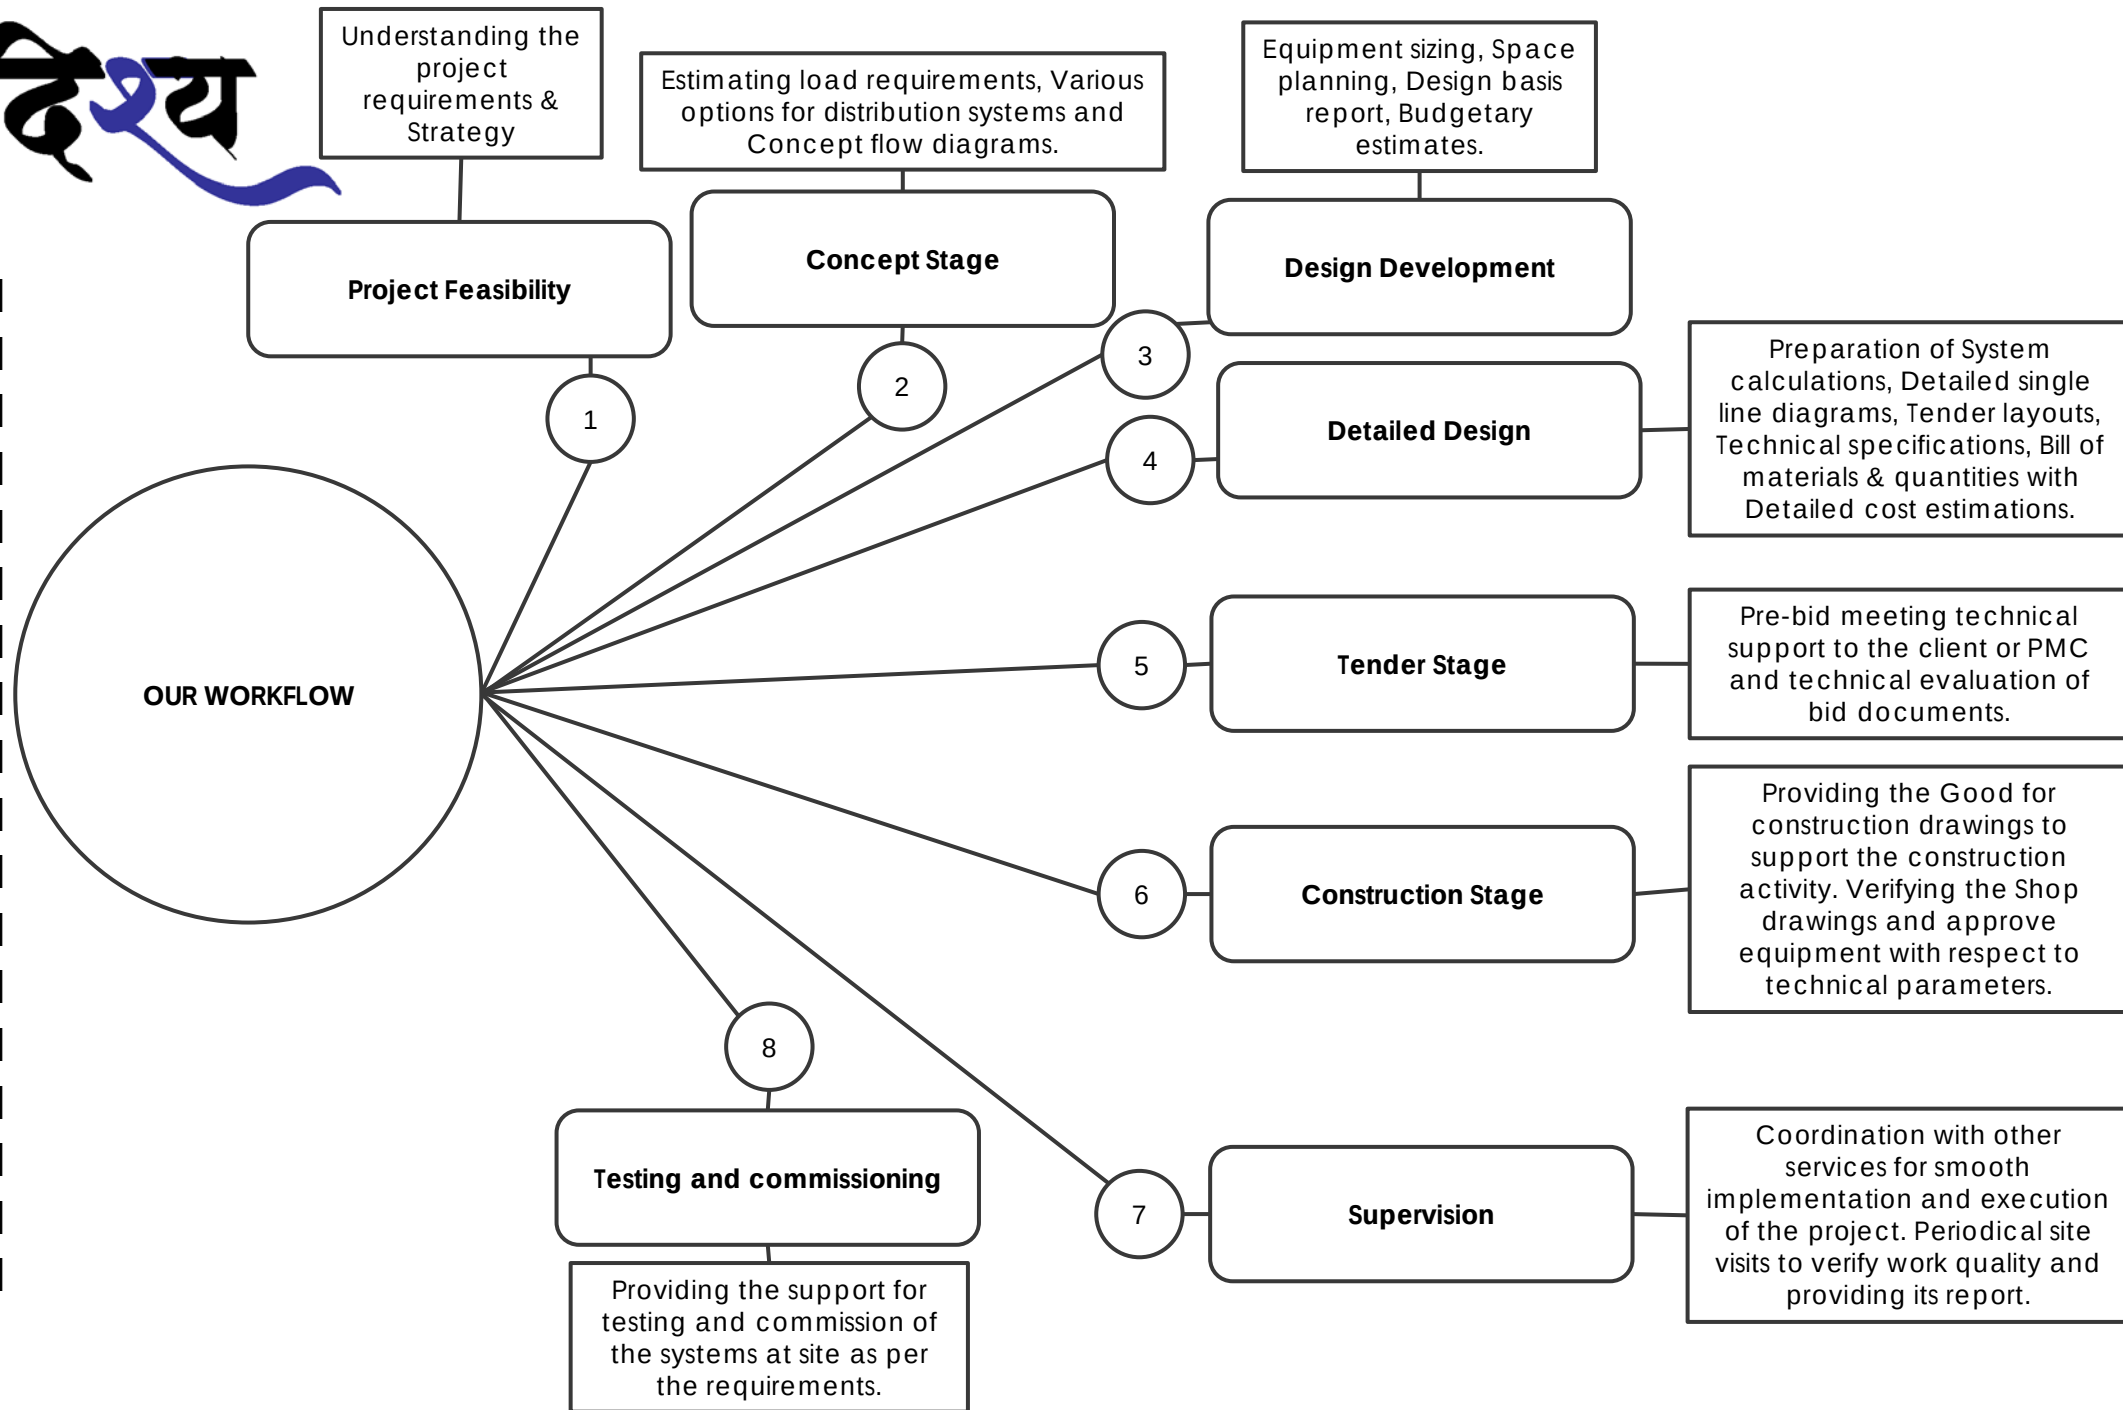

Quantity surveying services (Civil Works)

- Budgeting & cost estimation
- Quantity take-offs & rate analysis
- BOQ preparation & tender documentation
- Contractor evaluation & agreement drafting
- Technical specs & negotiation support

आदिश्य

WORKFLOW

Industries we serve

- Residences
- Individual Villa
- Commercials
- Public Spaces
- Industrials
- Gov. Housings
- Hospitality
- Healthcare
- Educational
- Recreational & Public Facilities
- Infrastructure & Urban Development

Our Forte (why choose us?)

- 12+ years of experience
- 50+ projects
- 100% client satisfaction

Our Mission

- To craft intelligent, reliable and sustainable MEPF designs for power performance to lead client's purpose.

Our Vision

- Redefine mindsets through clear, efficient and innovative designs.

Our Goal

- Lead the project with insights, build precision and deliver experiences.

Our Associates

At आदिश्य, we believe that no work is great in isolation. So here we gratefully discuss our power collaborative team who are equally visionary and shares excellence.

We work jointly with a recognized network of associates to ensure shared responsibility and technical expertise to each project.

Together we deliver solutions that are aligned to functional and broader architectural goals of each space to shape it efficient and future-ready.
